

EASYVID

THE DEVICE FOR IMPLEMENTING THE EASYCOV SALIVARY TEST

Objectives

EasyVID, a specific device for the PCR test developed by SkillCell, has been designed to make EasyCOV tests reliable and easy to perform.

- Result in 40 minutes
- Nomadic IVD medical device
- CE certified
- Dedicated to the EasyCOV test protocol

Applications

- Health actors
- Laboratories
- Companies
- Transportation (land, air, and sea)
- Event

Functionalities

SIMPLE

- Guided implementation
- Works with ready-to-use and disposable consumables
- Real-time visualization of the protocol's correct progress

PRACTICAL

- Minimum space requirement and maintenance
- Transportable in operational environment (Airports, Railway stations, Sports facilities, EHPAD...)
- Simple mains power supply

FAST

- Immediate installation
- Warm-up time: 10 minutes
- Up to 36 tests per hour
- Test result in 40 minutes

SECURED

- Reliability of incubation temperature at +/- 1°C
- Battery back-up in case of accidental interruption of the mains supply (20 min°).
- Alert signals in case of non-compliance with the protocol

SIMPLE

PRACTICAL

FAST

Specifications

CAPACITIES

| | |
|--|--------|
| Number of wells | 24 |
| Independence of well control | Yes |
| Manual protocol programming | No |
| Number of protocol phases | 2 |
| Light signals for a good protocol progress | Yes |
| Heating up time | 10 min |

MECHANICAL DATA

| | Min | Typ. | Max | Units |
|-----------------------|-----|------|-----|-------|
| Operating temperature | 5 | | 40 | °C |
| Humidity | 20 | | 80 | % |

| | L | W | H | Units |
|------------|-----|-----|----|-------|
| Dimensions | 300 | 270 | 85 | mm |
| Weight | | 2,5 | | Kg |

ELECTRICAL DATA

| | |
|------------------------|-----------------------|
| Power supply | 220V 50Hz / 110V 60Hz |
| Power Cable | Yes |
| Battery | Yes |
| Battery operation only | No |
